Study Abroad Opportunity-China (May 18-June 4, Summer I)
Gen 490 (Special Topics in Genetics)/GEN 806 (Special Problems in Genetics) (one credit):

One week of workshop on Clemson campus plus two weeks of internship in China. The workshop will focus on issues and challenges of forest/fruit tree genomics in China, US, and some other countries and these countries’ cultures. The overseas trip will include visits to 4-5 universities/research institutes in the cities of Beijing and Wuhan. Clemson students will have opportunities to interact with students from these universities/institutes and attend research seminars that involve forest/fruit tree genomics.

Enrollments: 10 students, Prerequisite: GEN300 or GEN302. Four fellowships available: through a USDA International Science and Education (ISE) grant to help cover the airfare. Submit an electronic copy of your application letter along with your CV, and transcript to Dr. Haiying Liang (hliang@clemson.edu). Minority students are strongly encouraged to apply.
